NEWS AFFECTING YOU

Air Force Reserve “legacy unit” supports Space Mission, looks to expand

One of first recorded uses of electromagnetic warfare stems back as early as the start of the 20th century during the Boer War when British soldiers used searchlights to spring Morse code signals off clouds, disrupting enemy communications. Since then, EW has evolved to be more precise, deliberate, and effective.

Operation JULEMAND 2023

On Nov. 29, 2023, with Christmas just three weeks away, members of Pituffik SB traveled north—70 miles as the reindeer fly—on a special sleigh provided by Air Greenland. The team, including the much-awaited Julemand, arrived at the village of Qaanaaq in the arctic darkness at 1 p.m. to deliver gifts.

TOP THINGS YOU NEED TO KNOW

ATHOC AND PEAK ALERTS SET-UP FOR DEPENDENTS

In an effort to better communicate various weather and installation emergency conditions, the AtHoc system allows the service member/sponsor to register their dependent's contact information to receive text message and phone call notifications. See the graphic posted to the bulletin on how to register your dependents for notifications.

Additionally, local Colorado Springs public safety agencies (police, sheriff, fire and emergency services) use a system called Peak Alerts to directly notify members of the community of dangerous conditions and actions that people should take during an emergency.

Peak Alerts notifications are targeted geographically, so agencies can narrow the notification to just those who are affected by the emergency situation. You can sign up for Peak Alerts at peakalerts.org.
